Network Management Card 3
AP9544 for Easy UPS On-line

1-Year Secure NMC Subscription is included with all UPS and PDU devices

Running your business without remote monitoring exposes you to unexpected issues and downtime.

The Schneider Electric Network Management Card for Easy UPS, 1-Phase enables essential and secure remote monitoring and management of your Easy UPS On-line.

Connecting your devices will improve the availability, resiliency and efficiency of your power infrastructure systems and the IT workloads they support.

- Monitoring and alarming
- Wherever-you-go visibility
- Preventative management
- Ongoing security compliance

Updating your NMC firmware matters

More and more cybersecurity breaches are linked to **neglected firmware.**

Proactive firmware updates help to protect your infrastructure to the highest level of cybersecurity thereby minimizing potential downtime.

80% Enterprises reported an attack on firmware
(Source: Microsoft Security Signals Report 2021)

Our new Secure NMC System will help you:

Reduce exposure to attack – Protect your connected devices with the latest security updates.

Achieve consistent compliance – Stay compliant with changing regulations and resilient for the entirety of the card's life.

Never become out-of-date – Stay ahead and easily deploy firmware enhancements for security and hardware optimization.

Benefit from the included subscription

A 1-Year Secure NMC Subscription is included with the purchase of the card.

Upon expiration of the provided Secure NMC Subscription, the purchase of a new subscription is required to extend the access to future firmware updates.

The NMC firmware is included with EcoStruxure™ IT Expert and Data Center Expert.
